## PROFILE

My career has allowed me to work in different areas of technology such as; front-end, back-end, database, design and project management. In addition to this, I have been able to learn how to adapt myself to different job styles. Also, I have had experience in traditional languages such as java. I have been participating in the development of an ERP using Microsoft technology as Silverlight, Team Foundation Server, MS SQL Server.

The technological world changes considerably, that is why it is imperative to know its latest tools and good practice. In recent years, I have taken on the task to train myself in the main technological areas such as: Frond-end, backend, git, digital strategy and marketing, mobile development, graphic design and usability, to name a few.
